# Homes come in every shape...

...size and design. So, whether your home is old or new, big or small, Contemporary or Colonial, finding a glass style that complements what you have is important.

Canterbury 2248

Finding the style of glass that reflects your needs and wants is even more important. Our designers understand this. They have created designs that are simple to intricate, clear to obscure. This is where metals, such as Brass, Zinc or Patina come together with textured glass pieces to create true works of art. Everyone is different and so are our designs.

Let Trimlite help you create a front entrance that will be the focal point of your home and a true reflection of your taste and style.

# Specifications

## Construction

Hand crafted, our decorative glass panels stay true to their stained glass roots. Using only solid metals, hand cut glass pieces and polished bevels, each panel is carefully assembled by hand. Once assembled, the panel under goes a thorough cleaning and inspection process. This attention to detail is our assurance of quality, allowing you to admire its beauty for years to come.

Each decorative panel is sealed between two pieces of Tempered Safety\* glass, using a state-of-the-art "Warm Edge" spacer bar system. This hermetic dual seal will ensure that your investment will maintain its appearance and give you long lasting performance for years to come.

*\*Tempered Safety glass is up to four times stronger (impact resistance) than annealed glass, providing piece of mind.*

## Warranties

Our products are covered by separate limited warranties. Please contact your dealer for more information.

## Privacy Rating

Trimlite offers an extensive line of designs to choose from. To help your decision making process, we have created a "Privacy Rating" for all of our designs. This will help you select the design that has the level of openness or obscurity that suits you best.

Note: This rating is subjective. It should only be used when comparing Trimlite designs.

2

**Completely Clear**  
Objects can be clearly seen through the glass from the opposite side.

**Diffused/Distorted**  
Objects are distorted, but can still be detected from the opposite side.

**Completely Opaque**  
Only light will travel through from the opposite side.

## Caming Options

Hand soldered metals in 3 finishes. See individual product pages for availability.

**Brass Caming**  
Subtle gloss finish that defines luxury and style.

**Zinc Caming**  
Brushed chrome appearance brings a contemporary look to your entrance.

**Patina Caming**  
Black satin finish offers a rustic or antique look to your home.

## Glass Options

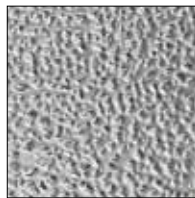

Bubbles, lines, slight surface imperfections or discolorations are characteristics of all hand crafted glass. They are not considered defects.
